Yulgilbar
Santa Gertrudis

Production Sale

Friday 2nd September 2016

12 noon, Broadwater Division Yards
Yulgilbar Station, Baryulgil NSW
Yulgilbar
Santa Gertrudis
Stud No. 13
2016 Production Sale
Friday 2nd September
Sale at Broadwater Division Yards
Cattle on Display from 9am
Sale commences 12 noon

Offering:
• 84 Santa Gertrudis Bulls (63 poll) – 75 Classified “S”
• 11 Sangus bulls (poll)
• 5 Classified Stud Santa Gertrudis females - ptic
• 200 ptic Sangus females
• 50 ptic Charolais Santa Cross females

Visit our web site or Facebook page for further sale information and supplementary sheets as they come available.

Please bring this catalogue to the sale

Disclaimer - Whilst all due care and attention has been paid to the accuracy in the compilation of this catalogue, either the vendors (or their employees) nor the selling agents assume any responsibility what so ever for the correctness, use or interpretation of the information included this sale catalogue.
• All persons attend Yulgilbar Station and the sale at their own risk.

Yulgilbar Airport
Baryulgil airfield is a private non licensed airfield located on Yulgilbar Station at Baryulgil NSW. The Airfield is fenced; located in a Cattle Paddock, the surface is sealed, the direction is approximately 150/330 degrees, and there is an uphill rise to the South East of approximately 20 meters over the 1600 metre length of the Airfield. Elevation is approximately 450 AMSL. Position: S29.13.3 E150.413818 & spn=4.46239,9.876709

Please contact the station prior to landing (24 hours notice) so arrangements can be made to meet planes on arrival and transport passengers to the sale.
• There are daily commercial flights to Grafton and Lismore airports by Rex Airlines.
• A number of motels are located in Tenterfield, Casino, Lismore and Grafton (prior booking recommended)
• Travel time by car to Yulgilbar Station (Broadwater division)
• Casino – 1 hour
• Tenterfield – 1 hour 30 minutes
• Grafton – 1 hour 15 minutes

Google Directions to Yulgilbar Sale:
Welcome

Welcome again to Yulgilbar for another Production Sale.

It has been a big year at Yulgilbar for many reasons. The rain although less than average, fell timely for us and our cattle have again performed well.

Good cattle prices have allowed us to undertake many infrastructural improvements to water supply, fencing and new genetics for Yulgilbar.

In my lifetime, there has never been a better time to be in the Cattle business.

The Australian Beef Cattle herd is now the lowest in 20 years, we have unprecedented demand for protein from Asia and globally; and now restocker demand is underpinning the Cattle market as many drought stricken areas see their first reprieve in far too long.

We are no strangers to awards for our cattle, now having now in 2016, won the National Santa Gertrudis Steer trophy for a record 9 times in the past 10 years. A highlight certainly has been our great results in the 2016 RNA Paddock to Palate Competition amongst a series of wins for us this past year. Our successes are only possible because of our dedicated team, led by Rob and Lorraine Sinnamon and ably assisted by Brett Ellem as Yulgilbar Overseer.

All of us at Yulgilbar thank our loyal supporters, as repeat custom remains the cornerstone of our client base. We value them and are committed to doing all we can in return.

We hope you will have a happy day and trust you find cattle that will suit your needs.

Good luck for the year ahead!

Sarah Myer
**SALE INFORMATION**

**Guarantee**

All stud stock are guaranteed breeders. Any claim against the breeding ability of any animal should be made in writing and accompanied by a veterinary certificate within 6 months of sale. In the event of an animal failing to breed, it may be either replaced with an animal of comparable value or credit to the purchase price will be given at the following sale or on a private sale animal.

**All lots sell as EU Accredited**

**Vendor rebate – The vendors agree to pay:**

**Stud Cattle:**

- 5% rebate to outside agents who
  - introduce buyers in writing at least 24 hours prior to the sale
  - accompany client to the sale
  - settle all accounts in full no later than 12th September 2014.
- 2% rebate to outside agents who introduce buyers at least 24 hours prior to sale and settle all accounts in full no later than 9th September 2016.

**Commercial cattle**

- Will attract a 1% rebate to outside agents introducing client to the sale.
- **No rebate will be paid outside these conditions. (strictly enforced)**

Delivery of sale cattle will be given from Saturday 3rd September 2016. No verbal instructions will be accepted and no cattle are to be loaded without approval of Rob Sinnamon or the delivery agent (George and Fuhrmann). Please fill out the delivery form at the back of the catalogue.

**Health**

- Yulgilbar Station is an accredited TB and Brucellosis free herd.
- Stock from Yulgilbar Station (Broadwater Division) will be free to move.
- Yulgilbar Station is in a Johnnes PROTECTED ZONE

**Vaccination Program All stud cattle will have been vaccinated for:**

- Botulism
- 7-1
- Peste-guard and tested negative for Persistently Infected (P.I.) animals
- 3 day sickness
- Bulls for vibrio
- All cattle have been treated with Dectomax pour-on and Flukecare C.

To maintain ongoing immunity, it is recommended that you vaccinate your purchases with an annual booster shot in June each year.

**Telephone Link up:** In the event of you being unable to be at the sale and would like to bid, we will arrange for a phone link up should you wish to participate. Please contact the vendor or your preferred agent prior to the sale.

- Tabulam Lions Club will cater morning tea and lunch.
Yulgilbar Station was founded in 1840 by Edward Ogilvie as a 200,000 acre sheep station. The run selected comprised the most fertile region of the Clarence River valley; in North Eastern New South Wales encompassing over 80 kilometers of the river. The property was owned by the Ogilvie family until being sold in 1926 to a syndicate of the Morrissey brothers and silent partners Tom Baillieu.

Sam Hordern was subsequently invited to join the syndicate, ultimately purchasing Yulgilbar in its entirety in 1949.

Sam was a foundation director of King Ranch Australia and the first President of the Santa Gertrudis Australia Association.

Sam Hordern’s daughter, Sarah and husband, Baillieu Myer, inherited Yulgilbar upon Sam’s untimely death in 1960. Today the property still remains under ownership of Sarah and Baillieu Myer.

WHAT’S IN A NAME:

Yulgilbar means ‘Place of many (or little) fishes’.

Yulgilbar is a heritage listed property of natural beauty and of environmental significance.

Yulgilbar contains much historical infrastructure, dating back to 1840. The station is also characterized by its impressive permanent water systems. Yulgilbar was proclaimed a Flora and Fauna reserve in 1971.

Farming: 4500 acres is currently farmed, growing summer and winter cash and fodder crops, supplying the feed requirements of the Station as well as running a significant Hay and Fodder sales business thru “Tooloonki Division”.

A herd of 5000 Santa Gertrudis cattle are now run on Yulgilbar. Yulgilbar weaner’s have long been renowned for their constitution and doing ability and, in particular, their ability to gain weight under favorable conditions. These steers have sold previously from Victoria to central Queensland with excellent results.

The first Santa Gertrudis bulls were introduced to Yulgilbar Station in 1953 over Durham Shorthorn type cattle with a Devon influence. 16 King Ranch bulls dominated the early history of Yulgilbar.

Other notable sires in the early history of Yulgilbar included bulls from Bolinda vale, sister stud - Elgee Park, Robenlea, Murrumbo, Yarrawonga, Winderadeen, Roseval, and The Lakes. These bulls all contributed to the development of the stud, along with numerous Station bred sires. Recognized cow lines in the Yulgilbar herd included the “Gold” family going back to a “Glen Prairie” cow (Kirkby family).

A major expansion of the stud has evolved over the last 10 years. 500 Stud females are currently single sire mated to elite Poll Santa Gertrudis sires.

Since 2002, 61 outside bred additional stud sires have been introduced to the Yulgilbar gene pool. A significant addition to Yulgilbar genetics eventuated in 2008 with the landmark purchase of “The Lakes” Santa Gertrudis stud (owned by the Bolster family). The female portion of this widely recognized and established stud were purchased; marking the merger of these 2 major stud operations. Yulgilbar now stands as the largest Santa Gertrudis stud cattle operation in NSW.

Significant AI programs are also conducted utilizing the best available genetics available. An Australian record at auction ($80,000) was paid in 2007 for Warena Sahara (poll). This record stood until 2015.
The Station and Stud were managed for many years by the Rogan family. Allan Rogan was manager of Yulgilbar from 1964 - 1987. He was largely responsible for the early success of the stud. The first annual production sale at Yulgilbar was conducted in September 1966. These annual production sales continued until the beef crash in 1974. These sales comprised the sale of bulls, females, steers and significant numbers of Quarter Horse.

Post 1974 Yulgilbar sold on a regular basis at the Summerland Santa Gertrudis sale in Casino.

Sam Hordern, King Ranch, and others were also responsible for introducing Quarter Horses to Australia. Today Yulgilbar Quarter Horse stud is run from Elgee Park on the Mornington Peninsula in Victoria.

Yulgilbar believe many breeds of cattle can benefit from the introduction of hybrid vigor through the use of Santa Gertrudis sires. To this end Yulgilbar also breed a number of Santa cows to Angus, Hereford and Charolais to demonstrate the benefit of crossbreeding with Santa Gertrudis. In recent times Yulgilbar has moved to the vertical integration of a significant portion of its product.

**Yulgilbar Staff**

Yulgilbar Station is fortunate to have an excellent team responsible for the management of the operation. Thank you for the contribution made by all these people.

**Yulgilbar currently has 50 bulls available for private sale from $3000.**

**Shows**

We are proud of our record in recent years exhibiting many stud cattle show champions up and down the East Coast of Australia. We have now consolidated our showing to focus on the commercial reality of our business. We are particularly proud of winning the **Santa Gertrudis Australia Association National Steer trophy** for 9 of the past 10 years.

We believe comparison of the end result is important and gives us an indication of how industry relevant our cattle are in the market place.

We have made a “commercial practice “of showing and then selling “different “steers at each competition. Yulgilbar has been also involved with the NSW D.P.I.; MLA and CRC in recent research and validation work including validation of the “Feedlot Calculator, CRC “Age to Puberty” scanning; and polled verification testing.
“Ongoing success in these Industry Relevant competition’s over the past decade in Eastern Australia, from Orange in the South to Rockhampton in the North, continues to validate Yulgilbar’s mantra as producing “Industry Focused, Commercially Relevant Genetics”.

General Manager, Rob Sinnamon notes that he has often heard Rival Santa Gertrudis Seed Stock Breeders argue that Yulgilbar bred bulls were early maturing and do not grow!

“We believe these Commercially driven results in both export and domestic classes disprove the myth that Yulgilbar cattle would not grow; and further proved that the performance bred in these coastal bred cattle enabled them to rival the best performance of all breeds Australia Wide.

Rob went on to say he believed Yulgilbar bulls to be the best value for money bulls currently on the market.”

Yulgilbar Pastoral Company are thrilled with the results of Yulgilbar Genetics in both the Export Category (Class 37) and Domestic Category (Class 38) in the Weight Gain Phase of the 2016 RNA “Paddock to Palate” Competition hosted by Mort and Co.’s Grass dale feedlot at Dalby in Queensland.

Having recorded numerous wins in this competition and other events over the last 14 years, has been further validated again this year, with significant wins in both the Export and Domestic classes, proving the market suitability, quality and performance of Yulgilbar Cattle.

710 steers (101 pens) from a wide geographic spread extending from Southern NSW to Northern Australia competed in the Competition.

A significant number of Australia’s leading Seed stock producers from most mainstream breeds entered the 100- day export category (60 pens), along with the 70- day Domestic Trade Class (40 pens).

In the Export Class, a pen of 6 Yulgilbar “Santa Charolais “Steers placed 2nd, recording an Average Daily gain of 2.9 kg/day for 100 days; while a purebred Yulgilbar Santa Gertrudis pen of 6 gained 2.71 kg/daily gain and placed 6th overall.

Yulgilbar had 5 steers rank in the top 30 steers in the export class winning -2nd,7th,9th,24th and 25th out of 430 steers.

Further proving the Commercial relevance and ability to perform early; as well as grow to Export weights, Yulgilbar steers dominated the weight gain component of class 38.

Fed for 70 days aiming at the Domestic Trade, Yulgilbar won 1st with a pen of Sangus Steers, gaining 3.224 kg/day.

Yulgilbar continued their success by also winning 2nd and 5th in the pen of 6 weight gain competition with Purebred Santa Gertrudis Genetics.

Eight Yulgilbar steers dominated the top 30 steers in class 38 winning-

1st,4th,5th,8th,9th,11th,21st and 23rd out of 280 steers in this class. The top steer gained a whopping 3.74kg/day topping both classes for weight gain.
Class 37 Export Class
- 6th overall
- 2nd Weight Gain pen of 6 Export steers (3.05kg/day)

Class 38 (Domestic -Trade Steers)
- 1st Weight gain pen of 6 Domestic Steers (3.32kg/day)

2014 Brisbane Royal Show Mort and Co Paddock to Palate Feedlot competition
- 2nd overall in Export Class

2015 Sydney Royal Feedlot Challenge competition
- Champion Individual Domestic Steer (purebred Santa Gertrudis)
- Reserve champion pen export steers on the hoof
- 1st Export class Individual dressing %
- 1st Export class (Individual Carcass)
- 2nd Domestic class (Highest Individual dressing %-purebred Santa Gertrudis)
- 3rd Individual steer on the Hoof- Export class
- 3rd pen of 6 Export Carcasses
- 3rd Export Class Individual Carcass
- 5th individual steer on the hoof Domestic class

2016 Sydney Royal Feedlot Challenge competition- Competition still in progress
- 2nd pen of 6 steers Export class (on the Hoof Judging)
- 3rd individual steer Domestic Class (on the Hoof Judging)

2016 Callide Valley Steer Competition
- 3rd pen of Grainfed steers overall

Feed Conversion
Recently a line of Santa Gertrudis steers were fed at Mort and Co’s Pine grove feedlot that not only demonstrated the weight gain potential of Yulgilbar Cattle, but also their amazing feed conversion performance. These steers converted a mind blowing kg of beef gained for every 3.9 kg dry matter consumed.
Yulgilbar Santa Gertrudis Steers

100-DAY FEEDLOT PERFORMANCE

| Entry Wt. | 402 |
| Final Wt. | 655 |
| Days on feed | 100 |
| ADG | 2.72 |
| Consumption (as fed) | 13.8 |
| Consumption (DM%) | 10.84 |
| Conversion (as fed) | 5.04:1 |
| Conversion (DM%) | 3.96:1 |

The Yulgilbar steers fed at Mort & Co’s Pinegrove feedlot were amongst the top 1% of performers based on a dry matter feed conversion basis. The steers achieved an exceptional conversion of 3.96:1 with an ADG of 2.74kg/hd/day.

The structure, temperament and overall shape of the steers is a credit to the Myer family and to Rob Sinnamon. Mort & Co take great delight in feeding cattle of this calibre.

Berry Reynolds – Private Client Manager
## Yulgilbar Sangus Steers

### 100-DAY FEEDLOT PERFORMANCE

| Entry Wt.   | 429 |
| Final Wt.  | 685 |
| Days on feed | 100 |
| ADG        | 2.75 |
| Consumption (as fed) | 13.8 |
| Consumption (DM%) | 10.84 |
| Conversion (as fed) | 5.04:1 |
| Conversion (DM%) | 3.96:1 |

"The Yulgilbar steers fed at Mort & Co’s Pinegrove feedlot were amongst the top 1% of performers based on a dry matter feed conversion basis. The steers achieved an exceptional conversion of 3.96:1 with an ADG of 2.74kg/hd/day.

The structure, temperament and overall shape of the steers is a credit to the Myer family and to Rob Sinnamon. Mort & Co take great delight in feeding cattle of this calibre.

Berry Reynolds – Private Client Manager"
Diversification of the Bull Breeding Program at Yulgilbar:

Yulgilbar, backed by continuing high demand for Sangus females at our annual production sale; has led to first retaining a small number of bulls for Private sale in 2013. Larger lines available are now available in 2014.

Sangus have been a significant arm in the Commercial Breeding Program at Yulgilbar for the past 10 years. These Composite Poll animals comprise The best of Angus and Santa Gertrudis genetics available.

Sangus are “flat backed” tropically adapted cattle are a blend of two of the most marketable and productive breeds of beef cattle used.

Australia Wide.....Sangus combine the productive traits of fertility and meat quality from Angus; while inheriting the proven performance and versatility of Yulgilbar Santa Gertrudis, in terms of weight gain, disease and parasite tolerance; and superior environmental adaptation.
Yulgilbar Sangus Females

Yulgilbar Sangus females combine the productive traits of Angus, with the performance, hardiness and maternal characteristics of Santa Gertrudis, making the female an ideal mother!

A finer coat than an Angus, more feminine and angular in outlook while maintaining the calving ease of both parent breeds. The males benefit from the hybrid vigour, and selected proven carcass performance of the Yulgilbar breeding program.

Given the huge uptake in popularity of Angus cattle in recent years these Sangus cattle are an option for producers looking to breed black cattle that comply easily with MSA (Meat Standards Australia) compliance.

At 19% Bos Indicus, Sangus carry enough “Indicus” content to adapt to harsher conditions. A sleeker coat and ability to travel make Sangus a great alternative to Angus, on harder coastal and northern areas. The superior carcass and weight gain of Sangus make them a leading alternative to Brangus and “Ultra Black.” Yulgilbar Sangus Steers have consistently performed well in Carcass and feedlot competitions underpinning the commercial relevance of these cattle.
The Cattle
EARLY maturing traits, good growth rates and the fact they are bred on tough coastal country and so perform wherever they go has placed Yulgilbar Santa Gertrudis genetics in high demand in recent years.
In particular, Yulgilbar bulls are giving crossbreeding weaner specialists in the Northern Rivers area, known as the State’s cattle breeding nursery, an edge in terms of presenting robust calves with the hybrid vigour required to be turned around quickly for premium markets. Yulgilbar cattle have proven time and time again that you can take coastal cattle west and perform, whilst the reverse proves difficult.

The Agents perspective
In fact, a third of the Santa Gertrudis-cross yarding at this year’s big two-day autumn George and Fuhrmann weaner sale in Casino were Yulgilbar blood, according to agent Darren Perkins.
And that has been the case for the past few years, Mr Perkins said.
“Yulgilbar genetics have certainly built a reputation for versatility, having the traits like early maturing, good growth rates and good maternal ability that commercial producers want,” he said.
Fellow Casino agent Allen Ramsey, Ramsey and Bulmer, said the breeding behind today’s Yulgilbar cattle and the nutrition and management used at Baryulgil was making for extremely practical bulls with the “do-ability” that the numerous commercial clients he purchased on behalf of were seeking.
“The base of the Yulgilbar herd is practical and commercial,” he said.
“We have been buying Yulgilbar cattle for clients from the Upper Clarence, Richmond and Tweed areas and have found as people are seeing the strength of the progeny, interest in Yulgilbar blood is increasing and the repeat custom is strong.
“The bulls have been used over all types of females and on all types of country with success”. Mr Ramsey said the bulls by Warenda Sahara, purchased by Yulgilbar for an Australian record price for a Santa Gertrudis bull of $80,000, creating a lot of interest. More of these bulls will be offered this year.

The Meat Processor Perspective
On the processing end, Atron Enterprises, say Yulgilbar cattle have become a favourite of theirs due to their “first class finish, grading and performance”.
Atron Enterprises last year turned over $65 million and processes 2500 head to Meat Standards Australia specifications, all over 150kg dead weight per week.
Managing director David Larkin said he keenly pursues Yulgilbar cattle and competitively bids on theme where ever he sees them, purchasing several thousand head since his company was set up in Casino three years ago.
“As a Victorian all my life, I thought I had seen some fantastic cattle,” he said.
However, Yulgilbar cattle had surpassed his expectations and were “true dollar performers”, he said.
“They have very high compliance with our market specs and tick all the boxes for what we are doing, particularly eating quality and yield,” he said.
“I’m very interested in Yulgilbar females. From a carcase perspective they are hard to beat”.

The Buyer perspective
David Scarrabelotti - (Green Mountain Pastoral Company)
“We run a mixed herd of Charbray, Droughtmaster and Brahman cross cows, joined to Yulgilbar Santa Gertrudis Bulls. The progeny are always consistent in temperament, confirmation and colour. They do well whether on our Coastal or New England Properties and are suited to all markets”.
Yulgilbar is proud to be associated with the achievements of our clients with Yulgilbar genetics. We love to hear of your successes as they occur as we strive to produce genetics that are commercially relevant whether they occur in the stud cattle arena or the commercial arena.
Cattle Selection and Santa Gertrudis Breedplan

Cattle selection
Yulgilbar advocates balanced assessment criteria for cattle selection. This combines visual appraisal for structural soundness, temperament and overall conformation; prudent use of raw measurement data - e.g. frame score, weight, daily weight gain, actual scrotal measurements, eye muscle area and fat scans. Selection of extremes should always be treated with caution. Yulgilbar supports the Santa Gertrudis classification system. Santa Gertrudis group breed plan provides estimates of breeding values that are also of assistance in making choices. Single trait selection for any characteristic is believed to be dangerous and lacks balance in any breeding program. Use of a combination of the many available “tools” for selection in the industry today is valuable and allows the discerning cattle person to be far more informed about their livestock selections than previously before.

• This Year's Sale Bulls have been tested for the Horn Poll Test (recently developed by Beef CRC and commercialized by Phizer). Results will be available on sale day and on our web site once available.
• Santa Gertrudis Group Breedplan figures supplied are July 2016 Group run.

Fertility
• All females, stud and commercial are pregnancy tested annually and all empty females are fattened and sold for slaughter
• Sale bulls are semen tested and soundness evaluated
• Sale bulls have been Morphology tested
• Sale bulls are tested negative for Persistently Infected carriers of Pesti- Virus
• Herd sires are semen tested annually.

Yulgilbar stud Santa Gertrudis and Yulgilbar Quarter horses are branded with Yulgilbar Symbol

Yulgilbar commercial cattle are branded with CO (helium).

Any commercial Yulgilbar females sold for breeding since 2005 have been cross branded with EO.
EBVs

An animal’s breeding value is its genetic merit, half of which will be passed on to its progeny. While we will never know the exact breeding value, for performance traits it is possible to make good estimates. These estimates are called Estimated Breeding Values (EBVs).

In the calculation of EBVs, the performance of individual animals within a contemporary group is directly compared to the average of other animals in that group. A contemporary group consists of animals of the same sex and age class within a herd, run under the same management conditions and treated equally. Indirect comparisons are made between animals reared in different contemporary groups, through the use of pedigree links between the groups.

EBVs are expressed in the units of measurement for each particular trait. They are shown as +ive or -ive differences between an individual animal’s genetics difference and the genetic base to which the animal is compared. For example, a bull with an EBV of +50 kg for 600-Day Weight is estimated to have genetic merit 50 kg above the breed base of 0 kg. Since the breed base is set to an historical benchmark, the average EBVs of animals in each year drop has changed over time as a result of genetic progress within the breed.

The absolute value of any EBV is not critical, but rather the differences in EBVs between animals. Particular animals should be viewed as being “above or below breed average” for a particular trait.

Whilst EBVs provide the best basis for the comparison of the genetic merit of animals reared in different environments and management conditions, they can only be used to compare animals analysed within the same analysis. Consequently, Santa Gertrudis BREEDPLAN EBVs cannot be validly compared with EBVs for any other breed.

EBVs are published for a range of traits covering fertility, calving ease, milking ability, growth, and carcase merit. When using EBVs to assist in selection decisions it is important to achieve a balance between the different groups of traits and to place emphasis on those traits that are important to the particular herd, markets and environment. One of the advantages of having a comprehensive range of EBVs is that it is possible to avoid extremes in particular traits and select for animals with balanced overall performance.

Birth Weight EBV (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200-Day Growth EBV (kg) is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal’s genetic merit for growth to early ages.

400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal’s genetic merit for yearling weight.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal’s genetic merit for growth beyond yearling age.

Mature Cow Weight EBV (kg) is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

Milk EBV (kg) is an estimate of an animal’s milking ability. For sires, this EBV indicates the effect of the daughter’s milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.
Scrotal Size EBV (cm) is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age. This EBV is an estimate of an animal’s genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

Carcase Weight EBV (kg) is based on abattoir carcase records and is an indicator of the genetic differences in carcase weight at the standard age of 650 days.

Eye Muscle Area EBV (sq cm) is calculated from measurements from live animal ultrasound scans and from abattoir carcase data, adjusted to a standard 300 kg carcase. This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcase. More positive EBVs indicate better muscling on animals. Sires with relatively higher Eye Muscle Area EBVs are expected to produce better muscled and higher percentage yielding progeny at the same carcase weight than will sires with lower Eye Muscle Area EBVs.

Rib Fat and Rump Fat EBVs (mm) are calculated from measurements of subcutaneous fat depth at the 12/13 rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcases) and are adjusted to a standard 300 kg carcase. These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcase. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcase weight than will sires with higher EBVs.

Retail Beef Yield EBV (%) indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcase. Sires with larger EBVs are expected to produce progeny with higher yielding carcasses.

Intramuscular Fat EBV (%) is an estimate of the genetic difference in the percentage of intramuscular fat (marbling) at the 12/13th rib site in a 300 kg carcase. Depending on market targets, larger more positive values are generally more favourable.

Selection Indexes

Santa Gertrudis selection indexes are calculated for two market specifications, namely, Domestic and Export. These Indexes relate to typical commercial herds targeting these specifications.

Indexes are reported as an EBV, in units of relative earning capacity ($’s) for a given market. They reflect both the short-term profit generated by a sire through the sale of his progeny, and the long-term profit generated by his daughters in a sustainable cow herd, if a proportion of heifers are retained for breeding.

The Indexes are derived using Breed Object technology. More information on this technology is available from the Breed Object web site.

Domestic Production Index ($) – Estimates the genetic differences between animals in net profitability per cow joined for an example self replacing commercial herd (run in a temperate environment) producing steers for the Domestic trade. This Index assumes that the steer progeny are pasture grown and finished and marketed at 500 kg live weight (280 kg HSCW and 12 mm P8 fat depth) at 16 months of age. Daughters are retained for breeding. More information is available on the EBV weightings for the Domestic Production Index.

Export Production Index ($) – Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd (run in a sub-tropical environment) producing steers for the Export trade. This Index assumes that the steer progeny are pasture grown and finished and are marketed at 620 kg live weight (340 kg HSCW and 15 mm P8 fat depth) at 28 months of age. Daughters are retained for breeding. More information is available on the EBV weightings for the Export Production Index.

Note that $Index Values for individual animals are sensitive to the assumptions used in the BreedObject analysis to calculate the relevant selection index.
Accuracy

Accuracy (%) is based on the amount of performance information available on the animal and its close relatives - particularly the number of progeny analysed. Accuracy is also based on the heritability of the trait and the genetic correlations with other recorded traits. Hence accuracy indicates the “confidence level” of the EBV. The higher the accuracy value the lower the likelihood of change in the animal’s EBV as more information is analysed for that animal or its relatives. Even though an EBV with a low accuracy may change in the future, it is still the best estimate of an animal’s genetic merit for that trait. As more information becomes available, an EBV is just as likely to increase in value, as it is to decrease.

Accuracy values range from 0-99%. The following guide is given for interpreting accuracy:

<table>
<thead>
<tr>
<th>Accuracy range</th>
<th>Interpretation</th>
</tr>
</thead>
<tbody>
<tr>
<td>less than 50%</td>
<td>Low accuracy. EBVs are preliminary and could change substantially as more performance information becomes available.</td>
</tr>
<tr>
<td>50-74%</td>
<td>Medium accuracy, usually based on the animal’s own records and pedigree.</td>
</tr>
<tr>
<td>75-90%</td>
<td>Medium-high accuracy. Some progeny information included. EBVs may change with addition of more progeny data.</td>
</tr>
<tr>
<td>more than 90%</td>
<td>High accuracy estimate of the animal's true breeding value.</td>
</tr>
</tbody>
</table>

As a rule, animals should be compared on EBVs regardless of accuracy. However, where two animals have similar EBVs the one with higher accuracy could be the safer choice, assuming other factors are equal.

For further information please contact Tropical Beef Technology Services or Santa Gertrudis BREEDPLAN
1. Tara Monarch
   (purchased for $25,000 in 2002)
   Semen available for sale.

2. Yulgilbar Wilga (by Kendara Olley)

3. Kendara Regional

4. Sujo Eagle (purchased for $40,000)
   Semen available for sale.

5. Yarrawonga Rogue
   (Junior Champion Bull Brisbane Royal and purchased for $22,000)
6. Yulgilbar Xcellence
(by Rosevale Embargo)

7. Dunlop Fraggle (poll) (Reserve Junior Champion bull Brisbane Royal and purchased for $22,500)

8. Yarrawonga Ramsey (poll)
(sired by Yarrawonga Matrix) and purchased for $16,000

9. Clanricard Blaxland (poll)
- successful show bull
by Eidsvold Staion Sparta (poll)

10. Dengall Yukon (poll)
- Reserve Senior Champion Bull
Sydney Royal and purchased with “The Lakes” Herd
11. Yulgilbar Achilles (poll)  
   - successful show bull  
   by Waco Freeman (poll)

12. Wave Hill Bonfire (poll)  
   - purchased for $28,000  
   Semen available.

13. Rosevale Comanche  
   - by Tyndale Noddy  
   (purchased for $17,000)

14. Kendara Zen (poll)  
   - by Kendara Wolly (poll)

15. Rosevale Noddy (Poll) - purchased  
    for $18,000 by Tyndale Noddy
16. Yarrawonga Vendetta (poll)  
   - Grand Champion Sydney Royal & Junior Champion Brisbane  
   - $16,000 by Waco Soldier

17. Yarrawonga Wallaby (poll) - purchased for $26,000 by Yarrawonga Promoter(P)

18. Diamond H Lawson (poll)  
   - Reserve Junior Champion bull  
   Brisbane Sire Diamond H General (P)

19. Yulgilbar Councillor (poll)  
   - outstanding A.I. son of Tyndale Noddy (poll)

20. The Lakes President P3 (poll) by Wilgaroon Jester (poll)
21. Cardona Legacy (POLL)  
- Purchased for $32 000 in 2012. Legacy unfortunately was hurt during his 2nd mating season at Yulgilbar and had to be sold for slaughter.

22. Canowindra Kodak(poll)  
- Purchased for $20 000 in 2012. A full brother to Canowindra Gold Edition, successfully used in the Bullamakinka Stud. Unfortunately we have only one seasons calves as Kodak contracted 3 Day Sickness after 6 months at Yulgilbar.

23. CO-OP (IMP) ( National Champion Best of Poll in the U.S. in 2012). Limited Semen was imported from Bill Barrett (5 Oakes Ranch) with an outstanding son being retained for future use at Yulgilbar.

24. Semen from Yarrawonga Volunteer (poll) Grand Champion Bull Beef Australia 2012. Limited semen was used.
New Release genetics in 2016 include:

1. Tookey Creek Geronomo (poll)
   Grand Champion Bull Sydney 2013

2. Dangarfield Valiant (poll)
   purchased for $23 000 in 2013

3. Yulgilbar Governor G38 (poll)
   son of Warenda Sahara (poll)

4. Yulgilbar Grange (poll)
   son of Warenda Sahara (poll)

5. Dangarfield Versatile (poll)
1. Watasanta Herdsman (poll) - Purchased for Top Price ($17,000) at Watasanta 2014

2. Cardona Nardoo (Poll) - Purchased for $14,000 2014 Cardona Canowindra Sale

3. Talgai Hurricane (Poll) - Purchased for Top Price bull 2014 Heartland Sale

5. Dangarfield Whip Cracker (poll) – Purchased for Top price $17,000 at 2014 Dangarfield sale.
6. Glen Oaks Jabba (Poll)  
   – Purchased for $26 000 at 2014  
   Santa Central Sale

7. Wave Hill H8 (Poll)- Purchased for  
   $11 000 at 2014 Santa Central Sale

8. Yulgilbar J18(P)  
   A.I son of 2012 US National  
   Champion Best of Poll CO-OP

9. Yulgilbar Jesus J74(P)  
   – Retained as Best Son of Cardona  
   Legacy(P) (now deceased)

10. Benellakey Jumbo Jim (PP)  
   – Purchased for $13 000 2015

PRESCRIBED CONDITIONS OF SALE BY AUCTION

Clause 18 (1) – The following conditions are applicable to and in respect of the sale by auction of land or livestock:

(a) The principal’s reserve price must be given in writing to the auctioneer before the auction commences.
(b) A bid for the seller cannot be made unless the auctioneer has, before the commencement of the auction, announced clearly and precisely the number of bids that may be made by us on behalf of the seller.
(c) The highest bidder is the purchaser, subject to any reserve price.
(d) In the event of a disputed bid, the auctioneer is the sole arbitrator and the auctioneer’s decision is final.
(e) The auctioneer may refuse to accept any bid that, in the auctioneer’s opinion, is not in the best interests of the seller.
(f) A bidder is taken to be a principal unless, before bidding, the bidder has given to the auctioneer a copy of a written authority to bid for on behalf of another person.
(g) A bid cannot be made or accepted after the fall of the hammer.
(h) As soon as practicable after the fall of the hammer the purchaser is to sign the agreement (if any) for sale.

Clause 18 (2) – The following conditions, in addition to the above, are applicable to and in respect of the sale by auction of residential property or rural land:

(a) All bidders must be registered in the Bidders’ Record and display an identifying number when making a bid.
(b) Subject to subclause (2A), the auctioneer may make only one vendor bid at an auction for the sale of residential property or rural land and no other vendor bid may be made by the auctioneer or any other person.
(c) Immediately before making a vendor bid the auctioneer must announce that the bid is made on behalf of the seller or announced “vendor bid”.

Clause 18 (2A) – the following conditions, in addition to the above, are applicable to and in respect of the sale by auction of co-owned residential property or rural land or the sale of such land by a seller as executor or administrator:

(a) More than one vendor bid may be made to purchase the interest of a co-owner
(b) A bid by or on behalf of an executor or administrator may be made to purchaser in that capacity.
(c) Before the commencement of the auction, the auctioneer must announce that bids to purchase the interest of another co-owner or to purchase as executor or administrator may be made by or on behalf of the seller.
(d) Before the commencement of the auction, the auctioneer must announce the bidder registration number of any co-owner, executor or administrator or any person registered to bid on behalf of any co-owner, executor or administrator.

Clause 18 (3) – The following condition, in addition to subclause (1), is applicable to and in respect of the sale by auction of livestock:

The purchaser of livestock must pay the stock and station agent who conducted the auction (or under whom immediate and direct supervision this auction was conducted) or the vendor the full amount of the purchase price:

(a) if that amount can reasonably be determined immediately after the fall of the banner – before the close of the next business day following the auction, or
(b) if that amount cannot reasonably be determined immediately after the fall of the hammer – before the close of the next business day following determination of that amount, unless some other time for payment is specified in a written agreement between the purchaser and the agent or the purchaser and the vendor made before the fall of the hammer.
WARNINGS

PENALTY FOR COLLUSIVE PRACTICES

It is an offence against the Property, Stock & Business Agents Act 2002 for a person to do any of the following as a result of a collusive practice, or to induce or attempt to induce another person by a collusive practice to do any of the following:

(a) to abstain from bidding, or
(b) to bid to a limited extent only, or
(c) to do any other act or thing that might prevent free and open competition.

Severe penalties may be imposed on persons convicted of collusive practices.

SUCCESSFUL BIDDERS

The actual successful bidder at an auction sale must give to the auctioneer or an employee of the auctioneer:

(a) the bidder’s name, or
(b) the name of the person on whose behalf the successful bid was made.

PENALTY FOR DUMMY BIDDING

It is an offence against the Property, Stock & Business Agents Act 2002 for a person to do any of the following:

(a) make a bid as the seller,
(b) make a bid of behalf of the seller (unless the person is the auctioneer),
(c) procure another person to make a bid on behalf of the seller.

Any bid made with the dominant purpose of benefitting the seller constitutes a bid made of behalf of the seller.

A bid may be found to be a bid made on behalf of the seller even though the seller did not:

(a) request the bid, or
(b) have any knowledge of the bid.

Severe penalties may be imposed on persons convicted of dummy bidding.

OCCUPATIONAL HEALTH AND SAFETY

All persons attending the sale are advised by the seller that the sale may involve a risk of physical harm and/or loss. Livestock, machinery, plant and equipment may be offered for sale and each such item has its own inherent risks that persons attending the sale need to appraise themselves of. All persons attending the sale do so at their own risk. All purchasers of items sold are advised that they must ensure, before each such item is removed from the sale, that it is safe and without risks to health when properly used. The seller does not accept any responsibility for any harm, loss or damage whatsoever and that you enter or attend the sale at your own risk. A Stud succeeds, not because it is big or long established, but because there are people who -

live it, sleep it, dream it, believe it and …

have great plans in store for the future for it!

Yulgilbar – a stud with a history,
with a vision for the Future!

Thank you for attending

We trust you enjoyed your visit to Yulgilbar.
We wish to thank those who supported us by purchasing cattle.
A sincere thank you to all the under bidders and friends of
Yulgilbar who attended our production sale.
Also to the Tabulam Lions and
Tabulam CWA for providing the catering.
